

# NetSpot Laptop Station Datasheet

## What is NetSpot ?

The NetSpot station is the management platform for your organization's Laptop PC's. It physically secures and dispenses the devices on demand using bar code and magnetic card, including credit card. It provides and manages the content of the devices. It re-initializes the devices after each use making sure all personal data is wiped.

All this to ensure user's enjoyment and peace of mind!

## NetSpot Laptop Station Product Overview

NetSpot is ideal for classrooms, hospitals, libraries, training centers, hotels & resorts (as a portable business center) as well as any corporation requiring an additional level of security in their operation.

NetSpot manages the content of each device according to the specific needs of each deployment location. It can simply be a series of applications and links on the WEB browser or it can be more sophisticated and can also provide custom made application to enable content push and pull. The content update is performed remotely and is completely transparent to the user.

NetSpot is very easy to use. The user simply navigates through simple steps on the touch screen to take or return a laptop. NetSpot supports multiple languages.

The NetSpot Laptop Station makes the most popular notebook available to the user, while eliminating all the technical hurdles associated with content management, Internet connectivity and recharging.

6 UPTO 102

The NetSpot Laptop Station holds up to 6 laptops. More laptops can be added to the site with the Laptop Extension module which holds 8 laptops. With 12 extensions, a total of 102 laptops can be made available. A laptop can be returned into any slot of the stations.

NetSpot is connected to the site Internet service either wired or via Wi-Fi. It can be installed on a counter top or secured to a pedestal. Only an AC power outlet is needed to get started. The laptops can be configured to access the Internet via a built-in Access point or to the site Wi-Fi service. The laptop web browser will open on the page configured for the site and ensure the client accepts Internet usage terms if needed prior to gaining access to Internet.

A NetSpot Dashboard, which consists of a WEB base administration tool, is available for NetSpot Stations status, transaction reports and control of all their stations.

# NetSpot Dashboard and Central Server

The **NetSpot Dashboard** is a web tool that provides you with all the information needed to remotely configure and manage their pool of **NetSpot** kiosks. The dashboard is rich in capabilities. It provides you with the ability to:

- **View the status of all their NetSpot stations.** Email alerts can be configured to the Operator Support email when Internet connectivity to kiosk is lost.
- **Configure stations based on the card type used:** employee card, credit card, VIP card, Cruise ship passenger card, barcode reader for libraries, etc.
- **Select the languages.** Up to 3 languages can be set per station (for example: English, Spanish and German). Multiple languages already supported. And it is simple to add more.
- **Select pricing and currency.** Ability to re-configure parameters based on changing demands (for example, permanently free for staffers, or implementing a free rental period promotion for a few days or weeks).
- **View transactions and create usage reports.** All transaction data can be exported in multiple formats including CSV and Excel.
- **Configure VIP rental cards** to the specific needs of a site. (for example, limit rental to one laptop per card, limit access to only one Laptop Station, etc.)
- **Temporarily stop rentals for maintenance purposes** (for example, during a Laptop Operating system upgrade).
- **Disable a slot** in the event an laptop is reported defective and guide local maintenance personnel by remotely unlocking the slot for laptop repair or replacement.

and much more...

## NetSpot Laptop Station Characteristics

### OPERATING SYSTEM:

- **CENTOS**

### SIZE AND WEIGHT:

- **Height:** 16 in (41 cm)
- **Width:** 20 in (51 cm)
- **Depth:** 16 in (41 cm)
- **Weight:** 52 pounds (24 kg)

### PEDESTAL:

- **Height:** 40 in (101.6 cm)
- **Weight:** 77 pounds (35 kg)

### TOUCH SCREEN:

- **Size:** 86 mm x 154 mm
- **Resolution:** 800 x 480 pixels

### INPUT/OUTPUT PORTS:

- **TWO RJ-45** for Internet feed via Ethernet cable or connectivity to another computer
- **TWO USB ports** for additional features such as a Barcode reader

### READER:

- **Magnetic swipe card** (credit card or others)
- **Chip/Swipe card** (credit card or others)
- **Barcode**

### CAMERA AND VIDEO RECORDING (OPTIONAL):

- **Front camera:** Video recording, VGA up to 30 frames per seconds. Configured for site based on security needs

### POWER SUPPLY:

- **115 V / 230 V**
- **Average power consumption:** 100 watts.

### WI-FI ACCESS POINT:

- **Built-in and configurable** to allow or deny internet access to laptop and other devices

Available countertop, pedestal or Open frame

**OS's Supported :** Apple, iOS, Android and Microsoft
