

NetSpot Tablet Station Datasheet

What is NetSpot ?

The NetSpot station is the management platform for your organization's Tablets... It physically secures and dispenses the devices on demand using a credit or VIP card. It provides and manages the content of the devices. It re-initializes the devices after each use making sure all personal data is wiped.

All this to ensure client enjoyment and peace of mind!

NetSpot Tablet Station Product Overview

NetSpot is ideal for classrooms, hospitals, libraries, training centers, museums, hotels, resorts, cruise ships, intercity trains and buses, as well as any corporation requiring an additional level of security in their operation.

NetSpot manages the content of each device according to the specific needs of each deployment location. It can simply be a series of applications and links on the WEB browser or it can be more sophisticated and also provide magazines, movies and custom made application to suite to actual environment. The content update is performed remotely and is completely transparent to the user.

NetSpot is very easy to use. The user simply navigates through simple steps on the touch screens to take or return an Tablet. **NetSpot** supports multiple languages.

The **NetSpot Tablet Station** makes the most popular tablet available to clients or guests, at a fee or for free, while eliminating all the technical hurdles associated with content management, Internet connectivity and recharging.

6 UP TO 126

The **NetSpot Tablet Station** holds up to 6 tablets. More tablets can be added to the site with the iPad Kiosk Extension which holds 10 tablets. With 12 extensions, a total of 126 tablets (with a 6 slots controller) can be made available. An tablet can be returned into any slot of the kiosks.

NetSpot is connected to the site Internet service either wired or via Wi-Fi. It can be installed on a counter top or secured to a pedestal. Only an AC power outlet is needed to get started. The tablets can be configured to access the Internet via a built-in Access point or to the site Wi-Fi service. The web browser will open on the page configured for the site and ensure the client accepts Internet usage terms if needed prior to gaining access to Internet.

A **NetSpot Dashboard**, which consists of a WEB base administration tool, is provided to **NetSpot Stations** status, transaction reports and control of all their Kiosks.

NetSpot Dashboard and Central Server

The **NetSpot Dashboard** is a web tool that provides you with all the information needed to remotely configure and manage their pool of **NetSpot** stations. The dashboard is rich in capabilities. It provides you with the ability to:

- **View the status of all their NetSpot stations.** Email alerts can be configured to the Operator Support email when Internet connectivity to kiosks is lost.
- **Configure stations based on the card type used:** employee card, credit card, VIP card, Cruise ship, passenger card, barcode reader for libraries, etc.
- **Select the languages.** Up to 3 languages can be set per station (for example: English, Spanish and German). Multiple languages already supported. And it is simple to add more.
- **Select pricing and currency.** Ability to re-configure parameters based on changing demands (for example, permanently free for staffers, or implementing a free rental period promotion for a few days or weeks).
- **View transactions and create usage reports.** All transaction data can be exported in multiple formats including CSV and Excel.
- **Configure VIP rental cards** to the specific needs of a site. (for example, limit rental to one iPad/card, limit access to only one NetSpot Station, etc.)
- **Temporarily stop rentals for maintenance purposes** (for example, during an tablet Operating system upgrade).
- **Disable a slot** in the event an tablet is reported defective and guide local maintenance personnel by remotely unlocking the slot for tablet repair or replacement.

and much more...

NetSpot Tablet Station Characteristics
